1. TAD BOOL

TAD BOOL

géneros bool

exporta bool, generadores, \neg , \vee , \wedge , \Rightarrow , **if • then • else • fi**

igualdad observacional

$$((true =_{\text{obs}} true) \wedge (false =_{\text{obs}} false) \wedge \neg(true =_{\text{obs}} false) \wedge \neg(false =_{\text{obs}} true))$$

generadores

true : \longrightarrow bool

false : \longrightarrow bool

otras operaciones

$\neg \bullet$: bool \longrightarrow bool

$\bullet \vee \bullet$: bool \times bool \longrightarrow bool

$\bullet \wedge \bullet$: bool \times bool \longrightarrow bool

$\bullet \Rightarrow \bullet$: bool \times bool \longrightarrow bool

axiomas $\forall x, y: \text{bool}$

$\neg \text{true}$ \equiv false

$\neg \text{false}$ \equiv true

$\text{true} \vee x$ \equiv true

$\text{false} \vee x$ $\equiv x$

$\text{true} \wedge x$ $\equiv x$

$\text{false} \wedge x$ \equiv false

$x \Rightarrow y$ $\equiv \neg x \vee y$

if true then a else b fi \equiv

a

if false then a else b fi \equiv

b

Fin TAD

2. TAD NAT

TAD NAT

géneros nat

exporta nat, generadores, observadores, +, −, \times , <, \leq , mín, máx

usa BOOL

igualdad observacional

$$(\forall n, m : \text{nat}) \left(n =_{\text{obs}} m \iff \left((n = 0? =_{\text{obs}} m = 0?) \wedge (\neg(n = 0?) \Rightarrow (\text{pred}(n) =_{\text{obs}} \text{pred}(m))) \right) \right)$$

observadores básicos

$\bullet = 0?$: nat \longrightarrow bool

$\text{pred} : \text{nat } n \longrightarrow \text{nat} \quad \{ \neg(n = 0?) \}$

generadores

$0 : \longrightarrow \text{nat}$

$\text{suc} : \text{nat} \longrightarrow \text{nat}$

otras operaciones

$\bullet + \bullet : \text{nat} \times \text{nat} \longrightarrow \text{nat}$

$\bullet - \bullet : \text{nat } n \times \text{nat } m \longrightarrow \text{nat} \quad \{ m \leq_{\text{nat}} n \}$

$\bullet \times \bullet : \text{nat} \times \text{nat} \longrightarrow \text{nat}$

$\bullet < \bullet : \text{nat} \times \text{nat} \longrightarrow \text{bool}$

$\bullet \leq \bullet : \text{nat} \times \text{nat} \longrightarrow \text{bool}$

$\text{mín} : \text{nat} \times \text{nat} \longrightarrow \text{nat}$

$\text{máx} : \text{nat} \times \text{nat} \longrightarrow \text{nat}$

axiomas $\forall n, m: \text{nat}$

$0 = 0? \equiv \text{true}$

$\text{suc}(n) = 0? \equiv \text{false}$

$\text{pred}(\text{suc}(n)) \equiv n$

$n + m \equiv \text{if } m = 0? \text{ then } n \text{ else } \text{suc}(n + \text{pred}(m)) \text{ fi}$
